OKI

B4000 SERIES MONO PRINTERS

B4100: Personal printing for professionals

Mono printing is the engine room of a smooth running business, the unsung hero powering through the workload.

More uptime and less downtime are simple prerequisites.

Historically, a buyer choosing a printer has had to select between individual benefits such as highest quality print, greatest memory, fastest first page to print or most pages per minute.

However, these days business demands a more holistic approach. Business demands that we excel in all areas because they all impact together on the productivity of a business.

As business specialists, Oki understands this and ensures our printers work the way good businesses work. Synergistically and therefore productively.

Oki mono printers are built to perform with all class-leading attributes working together. They also work efficiently across all other areas that affect productivity.

For example, a printer delivering more pages per minute is not truly efficient if you have to wait for a slow processor, or have to stop because its small memory keeps on becoming full. Likewise, greater memory and faster processing speed are of little use if you're constantly refilling a paper tray with limited capacity. Maximising office productivity is about striking a balance of all key performance benefits. Ensuring each works in unison.

ANOTHER WAY OF THINKING IN MONO PRINTING

Business thinking we bring to every new printer.

Equally important, our printers are built to cope with the fast-moving world of business. A world where you can't afford things to go wrong. Which is why our 'Ask Oki' support service is so valuable in providing immediate help and assistance at the touch of a button. You'll find the 'Ask Oki' button on your printer's driver screen; it will take you straight to a dedicated web site.

Business insight and innovation that makes your decision to buy Oki an inspired one.

It's another way of thinking in mono printing.

THE B4000 SERIES

With the B4000 Series printers Oki continues to lead the field in delivering high speed, professional office printing in extremely compact and powerful machines. They are ideal wherever the priorities are fast output, quality printing, unbeatable value and high office productivity.

There are three models in the B4000 Series: the B4100 for the individual business user and the B4250 and B4350 ideal for smaller-sized workgroups.

B4350: Reliable, high-speed professional printing for personal and very small workgroup users

All offer years of reliable service and the B4250/B4350 have options for networking and upgrades, so you'll find the B4000 Series can be specified to meet your requirements, precisely. Our printers excel in all areas affecting workplace productivity. Choose your printer and its particular benefits based on the specification requirements for your business.

THE PRINTERS OF CHOICE FOR BUSINESS USERS

THE B4100

Offering excellent print and processing speed for your money, the B4100 is the consummate mono printer for the individual business user. Compact (A4), stylish and robust, it boasts class-leading features including 18 pages per minute (ppm), 8MB RAM memory and faster first page to print at 6.2 seconds. Ideal for the personal desktop where high quality documents such as reports, letters and labels are required.

THE B4250

Keep business flowing smoothly with this supremely productive A4 mono printer. Perfect for very small workgroups and personal desktop applications, it produces an impressive 22 ppm with 16MB memory upgradeable to 272MB. Options include network capability, second input tray and multi-purpose feeder for different paper stock, making it a highly flexible and affordable printer for a multitude of printing tasks.

THE B4350

A flexible mono printer compatible with all major operating systems, handling legacy environments, PCL and Postscript. The B4350 features point-of -service applications, as well as a user-friendly front panel so that you always know what your printer is doing. It makes it the ideal choice where performance and a compact footprint is a necessity for businesses, such as hotel receptions or a retail environment. To minimize user intervention and reduce cost per copy on mailshots, reports and charts for example, it also boasts a high capacity toner cartridge. Professional printing made to look easy.

WHATEVER YOUR PRINTING NEEDS, OKI MEANS BUSINESS.

WHY OKI?

We believe that effective printed communications are fundamental to successful businesses. That's why we focus purely on understanding their diverse printing requirements. Through our considerable technological resources we develop fast, high quality, cost-effective printing solutions that will benefit businesses today and long into the future.

It is the same progressive spirit that drove Kibataro Oki to found Oki Electric in 1881, and which helped his company to become the global, multi-billion Euro business that it is today. A business whose people share one single-minded purpose: helping other businesses grow and prosper by enabling them to create the best possible impression with their printed communications.

EVERY KIND OF PRODUCT FOR EVERY KIND OF BUSINESS

Whether your business is a start-up or a multinational, we have the products to suit your needs from dot matrix printers to mono and colour multi-functional units. Because we have such a diverse product range, we have colour-coded our product segments to help you save time. When it's time to add another printer to your range or to check out the latest advances in technology on our website, simply use the following colour guide.
